ACCRA TECHNICAL UNIVERSITY COMMISSIONS 30-SEATER TOILET FACILITY TO MARK WORLD ENVIRONMENTAL HEALTH DAY

In commemoration of World Environmental Health Day, Accra Technical University (ATU) has officially commissioned a 30-seater toilet facility aimed at benefiting the University community. The facility, which was handed over during a ceremony on 26th September 2024, marks a significant step towards improving sanitation on campus.

ACCRA TECHNICAL UNIVERSITY COMMISSIONS 30-SEATER TOILET FACILITY TO MARK WORLD ENVIRONMENTAL HEALTH DAY

In commemoration of World Environmental Health Day, Accra Technical University (ATU) has officially commissioned a 30-seater toilet facility aimed at benefiting the University community. The facility, which was handed over during a ceremony on 26th September 2024, marks a significant step towards improving sanitation on campus.

Speaking at the commissioning, the Acting Vice-Chancellor, Professor Amevi Acakpovi, emphasized the timeliness of the event, noting how it coincided with World Environmental Health Day. He highlighted the importance of environmental health and sanitation in an academic setting like ATU, where a growing student population poses new challenges. According to him, the facility is one of several measures being taken by the University management to safeguard the health of students and staff on campus.

The Municipal Chief Executive for Korle Klottey, Mr. Nii Adjei Tawiah, also expressed his satisfaction with the initiative, praising the University's commitment to sanitation. He noted that this goal aligns with the Assembly's own priorities and expressed optimism

that the facility would offer significant benefits to both staff and students alike.

Mr. Solomon Okuley, the Coordinator for the project, who oversaw the facility's development, expressed his delight at its completion. He stressed the importance of maintaining the facility and called for the construction of more such infrastructure to further improve campus sanitation.

The newly commissioned 30-seater toilet facility is designed to serve both students and staff, with an inclusive section reserved for people with disabilities. This feature ensures that the facility provides convenience and accessibility to all members of the University Community

ACCRA TECHNICAL UNIVERSITY RECEIVES 800KVA GENERATOR FROM IFC

Accra Technical University (ATU) has received an 800KVA generator from the International Finance Corporation (IFC) to boost its energy capacity. This donation, which comes at a critical time, will help address the growing energy demands caused by the university's expanding student population and infrastructure.

ACCRA TECHNICAL UNIVERSITY RECEIVES 800KVA GENERATOR FROM IFC

Accra Technical University (ATU) has received an 800KVA generator from the International Finance Corporation (IFC) to boost its energy capacity. This donation, which comes at a critical time, will help address the growing energy demands caused by the university's expanding student population and infrastructure. At the official handing over ceremony on September 27, 2024, ATU's Acting Vice-Chancellor, Professor Amevi Acakpovi, expressed the university's gratitude, noting that the generator would significantly improve energy efficiency and support the institution's growth.

Cemile Hacibeyoglu Ceren, Senior Country Officer of IFC, reaffirmed IFC's commitment to supporting educational institutions like ATU, emphasizing the importance of sustainable investments in technical and vocational education. This donation is part of a series of generous contributions from IFC, including previous donations of IT equipment and laptops, which have helped improve resources and accessibility at ATU. The 800KVA generator is expected to enhance the university's operational efficiency as it continues to expand.
